**Living animal
transport assistance**

All transport of living animals perfectly organized

Whether it involves one animal or a whole herd: the Livanta online platform brings supply and demand together. This ensures smart planning, lower costs and lower CO₂ emissions.

Livanta stands for Living Animals Transport Assistance: and this is exactly what we do! Our origin can be found in the addition 'by Kanters'.

We organize everything around the transport of living animals. Moreover, we attempt to arrange a matching freight out or back, to reduce the number of empty loads. Professional, efficient, and for a competitive price.

In addition to the mediation on our platform, we also take care of the necessary paperwork. These include the preparation of Traces, inspection requests, travel journals, and e-Cert export certificates.

We know the country-specific rules exactly and have the expertise to act quickly and safely.

The equipment: modern and safe

Livanta only works with certified drivers and modern-equipped trucks. These comply with the latest European laws and regulations and are fitted with automatic drinking systems, GPS-tracking systems, mechanical ventilation, temperature registration, and monitoring, and type 2 approved for long-distance transportation.

Livanta is also your partner for the transportation of zoo animals or other non-regular transport. For this specific transportation, we look for the best available transport option and adjust the transport exactly to the size and needs of the animal.

As a subscriber, you have continuous access to all new loads and empty trucks!

If you always want to be informed about new loads or transports, then a subscription is ideal! At Livanta you choose the most suitable solution yourself.

With a subscription as a freight provider or transporter you have access to our platform 24/7, and you can register your animals or empty truck directly yourself: Fast and easy!

why collaborate with Livanta?

- Animals safe and sound from A to B
- Certified driver and transport vehicle
- Vehicle disinfection
- Required permits
- Fewer empty vehicles on the road
- Quality and safety
